sibaranienrogel@gmail.com | portoenrogel.vercel.app

Computer Technology student at Institut Teknologi Del with a strong focus on IT infrastructure, system administration, and DevOps engineering. Proficient in Linux server administration, virtualization, and containerization workflows using Docker and Docker Compose. Experienced in developing responsive web applications and integrating Deep Learning models into cross-platform mobile systems. Eager to leverage system deployment, container orchestration, and infrastructure automation skills in professional software and engineering environments.

EDUCATION

Institut Teknologi Del <i>Diploma (D3) in Computer Technology GPA: 3.07/4.00</i>	Aug 2023 – Sep 2026 (Expected) <i>Sitoluama, Toba</i>
SMA Negeri 1 Tarutung <i>Senior High School - Natural Sciences (MIPA)</i>	Jul 2020 – May 2023 <i>Tarutung, North Sumatra</i>

TECHNICAL & SOFT SKILLS

Programming & Web:	C, Java, JavaScript, Python, Dart, Flutter, Next.js, React, HTML5, CSS3, Tailwind CSS
DevOps & Infrastructure:	Docker, Dockerfile, Docker Compose, Docker Container Management, Ansible, Basic Kubernetes, Basic CI/CD
System & Networking:	Linux (Ubuntu Server), Nginx, Network Troubleshooting, Virtualization (KVM, oVirt, VirtualBox, Vagrant), SMTP
AI & Databases:	Deep Learning Fundamentals, CNN, Image Classification, OpenCV, YOLO, PostgreSQL, MongoDB
Tools & Soft Skills:	REST API, Context API, LocalStorage, GitHub Pages, JSON-LD, Trello, VS Code, Problem Solving, Technical Documentation

WORK EXPERIENCE

PT Telkom Indonesia <i>IT Infrastructure & Application Deployment Intern</i>	Jan 2026 – Jul 2026 <i>Indonesia</i>
- Applied core containerization concepts using Docker to streamline multi-environment application deployments. - Authored and maintained optimized Dockerfiles for automated application build and container execution pipelines. - Managed Docker images, container lifecycles, environment variables, and network port mapping configurations. - Implemented Docker Compose to orchestrate multi-container application stacks and integrated backend microservices. - Diagnosed and resolved deployment environment bottlenecks, container networking issues, and Docker runtime bugs. - Systematically documented project progress, task boards, and deployment workflows using Trello. - Presented periodic technical progress updates and project status reports to senior engineering mentors.	
Himpunan Mahasiswa Teknologi Komputer (HIMATEK IT Del) <i>Active Member</i>	Sep 2023 – Sep 2026 <i>Sitoluama, Toba</i>
- Actively participated in executing student association programs, technical workshops, and campus organizational events. - Collaborated with cross-functional committee teams to ensure effective communication and event logistics management. - Developed strong team coordination, technical documentation, and interpersonal communication skills.	

KEY PROJECTS

ChiliScan - Chili Classification & Production Estimation App <i>Tech Stack: Flutter, Python, CNN, Flask, REST API, Deep Learning</i>	2026
- Developed a cross-platform mobile application integrated with a Deep Learning backend for chili maturity classification and yield estimation. - Implemented mobile camera capture integration in Flutter and established RESTful API communication for real-time model inference.	
Dockerized Application Infrastructure & Deployment <i>Tech Stack: Docker, Dockerfile, Docker Compose, Node.js, Nginx</i>	2026
Architected and deployed a containerized web application stack with multi-container orchestration via Docker Compose.	

- Configured container volume persistence, isolated network bridges, and custom Nginx reverse proxy routing.

HIU Rent A Car Silangit Web Platform

2026

Tech Stack: HTML5, CSS3, JavaScript, GitHub Pages, Local SEO, JSON-LD

- Built a responsive web portal for car rental services in Silangit featuring direct WhatsApp booking integration.
- Implemented technical SEO strategies, canonical tags, XML sitemaps, and Local Business JSON-LD structured data.

MyShop - E-Commerce Web Application

2025

Tech Stack: Next.js, React, Tailwind CSS, Context API

- Developed a modern e-commerce web platform with product browsing, dynamic filtering, interactive cart state, and an admin dashboard.

Task Manager & Todo Web Application

2025

Tech Stack: HTML5, CSS3, JavaScript (ES6+), LocalStorage

- Engineered a task management application with priority sorting, deadline alerts, dark mode toggle, and JSON import/export functions.

CERTIFICATIONS & LANGUAGES

- **Dicoding Indonesia:** Belajar Prinsip Pemrograman SOLID (2025)
- **Dicoding Indonesia:** Belajar Dasar AI (2025)
- **Dicoding Indonesia:** Memulai Pemrograman Dengan C & Java (2025)
- **Cisco Networking Academy / Partner:** HTML Essentials Certificate (2025)
- **English Proficiency:** TOEFL English Brighten: 583 (2026) | TOEFL ITP: 487 (2026)
- **Languages:** Indonesian (Native / Fluent), English (Intermediate - Upper Intermediate)
