## PROFESSIONAL SUMMARY

Computer Technology graduate (D3, Institut Teknologi Del, GPA 3.07/4.00) with hands-on experience in software development, backend systems, containerization, and IT infrastructure. Completed an IT Infrastructure & Application Deployment internship at PT Telkom Indonesia, using Docker, Docker Compose, Linux, and Nginx to deploy and troubleshoot multi-container applications. Built NEXUS, a full-stack platform (Next.js, TypeScript, Node.js, PostgreSQL) for Docker and Kubernetes monitoring, security scanning, and AI-assisted incident analysis. Seeking entry-level Software Engineer, Backend, DevOps, Cloud/Infrastructure, or IT Engineer roles.

## WORK EXPERIENCE

**PT Telkom Indonesia** | *IT Infrastructure & Application Deployment Intern* Jan 2026 – Jul 2026

- Containerized applications with Docker and wrote and maintained Dockerfiles to automate builds and container execution across multiple environments.
- Orchestrated multi-container stacks with Docker Compose, integrating backend microservices and managing images, container lifecycles, environment variables, and port mappings.
- Troubleshooted and resolved container networking issues, Docker runtime errors, and deployment bottlenecks in application environments.
- Documented deployment workflows and tracked tasks in Trello; presented regular progress reports to senior engineering mentors.

## SELECTED PROJECTS

**NEXUS – Intelligent Infrastructure & Application Platform** | *Personal Project* 2026

Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Docker, Kubernetes, Nginx, GitHub Actions, JWT, OpenRouter |

github.com/jeremytempest636-netizen/nexus-platform

- Built a full-stack platform to manage applications and Docker-based deployments from one interface, with container and infrastructure monitoring (CPU, memory, disk, network, restart count) and centralized logs.
- Integrated the Kubernetes API to view nodes, deployments, pods, and services, and to scale deployments and restart pods.
- Developed a Security Center for container and image inspection, npm dependency vulnerability scanning, and network and secrets exposure detection; implemented JWT authentication, RBAC, and audit logging.
- Integrated the OpenRouter LLM API with Docker telemetry for AI-assisted root cause analysis and a DevOps AI Copilot chat; configured GitHub Actions CI (ESLint, TypeScript checks, Next.js build).

**Dockerized Application Infrastructure & Deployment** | *Docker, Docker Compose, Node.js, Nginx* 2026

- Deployed a containerized Node.js web stack with Docker Compose, using persistent volumes, isolated bridge networks, and a custom Nginx reverse proxy.

**ChiliScan – Chili Classification & Production Estimation App** | *Flutter, Python, Flask, CNN* 2025

- Developed a cross-platform Flutter app with camera capture, connected via REST API to a Python/Flask CNN backend for chili maturity classification and yield estimation.

**Web Projects** | *Next.js, React, JavaScript, Tailwind CSS* 2025 – 2026

- Built MyShop (e-commerce app with filtering, cart state, and admin dashboard), HIU Rent A Car Silangit (responsive website with SEO and JSON-LD), and a Task Manager app (JavaScript ES6+).

## TECHNICAL SKILLS

**Programming:** TypeScript, JavaScript, Python, Java, C, PHP, Dart

**Web & Backend:** Node.js, Next.js, React, Flask, REST API, API Integration, Prisma ORM, Flutter, HTML5, CSS3, Tailwind CSS

**DevOps & Infrastructure:** Docker, Docker Compose, Dockerfile, Containerization, Kubernetes (kubectl, kind; foundational), CI/CD, GitHub Actions, Ansible, OpenTofu (IaC; foundational), Nginx, Application Deployment

**Database:** PostgreSQL, MySQL, MongoDB, SQL, Database Migration

**Systems & Monitoring:** Linux (Ubuntu Server), Virtualization (KVM, oVirt, VirtualBox, Vagrant), Network Troubleshooting, Container Monitoring, Health Checks, Incident Management

**Security:** JWT, RBAC, Audit Logging, Container & Image Security, Dependency Scanning

**AI / Data:** LLM API Integration (OpenRouter), Root Cause Analysis, CNN, Image Classification, OpenCV, YOLO

**Tools:** Git, GitHub, Trello, VS Code

## EDUCATION

**Institut Teknologi Del** | *Diploma (D3) in Computer Technology, GPA 3.07/4.00*

Aug 2023 – Sep 2026

## CERTIFICATIONS

**Dicoding Indonesia (2025):** Basic AI; Programming with C; Programming with Java; SOLID Programming Principles; Programming with Haskell; Project Management Fundamentals

**The Linux Foundation (2025):** Getting Started with OpenTofu

**Aguna Course (2025):** Python Fundamental; Linux Fundamental; Virtual Machine Fundamental

**Cisco Networking Academy (2025):** HTML Essentials

## LANGUAGES

Indonesian (native); English (intermediate to upper-intermediate), TOEFL ITP 487, TOEFL Brighten 583 (2026)
